The Future of Energy Recovery Ventilation is Here

# Mustang

## Why Choose CORE Mustang?

### Patented Polymer Membrane

All CORE exchangers are made with a patented polymer membrane that transfers both sensible and latent energy, while also blocking the transfer of gases and other contaminant.

### Performance

Meets ASHRAE 90.1 with 50% to 60% total effectiveness across operating range.

### Healthy CORE

Exchangers are water washable with polymer membrane that passes ISO hygiene testing.

### 50% Lower Pressure Drop on Supply Air Side

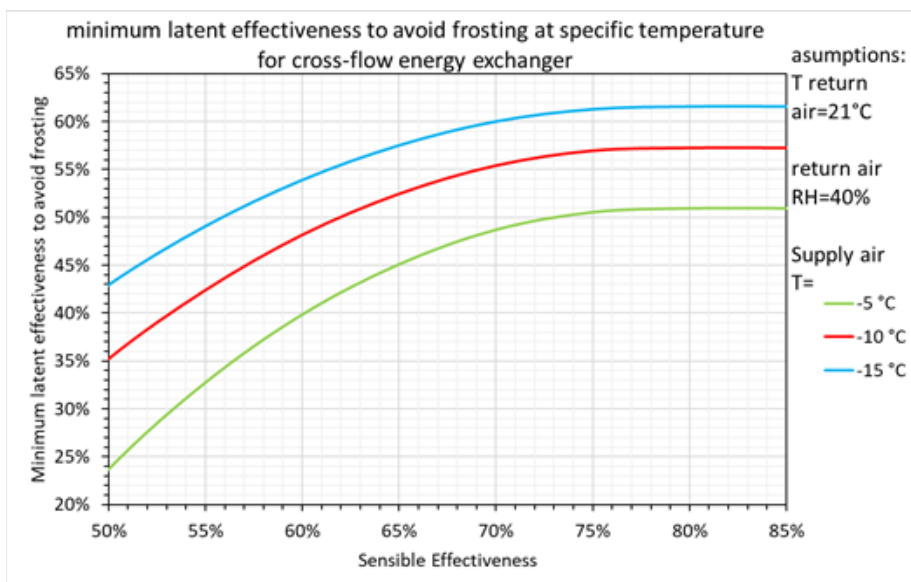

Lower specific fan power and energy consumption.

### Very Low Gas Cross-over

Polymer membrane tested with a variety of gases, odors, and VOCs to have less than 1% cross-over.

### Cold Climate Advantage

Operate at lower temperatures before requiring defrost.

- Patented polymer membrane only in CORE exchangers
- Water washable
- Mold and bacteria resistant
- Freeze tolerant
- AHRI certified to <1% EATR
- It meets ASHRAE 90.1 with 50% to 60% total effectiveness across operating range

### COMMERCIAL SIZES

575, 600, 750, 1000 mm

### RESIDENTIAL SIZES

250, 309 mm
