

C-ERV 389

Highest quality in a compact design

Description

The C-ERV 389 is a highly versatile product, housed in an aluminum casing. It is a reliable solution for use in both centralized and decentralized ventilation systems. With its even more compact and flatter design, the C-ERV 389 is a popular choice for installations in the outer wall of a building to save space or for ceiling/wall installations that require a very flat design. Additionally the special polymer membrane allows moisture transfer.

Product benefits

- Manufactured using a mold and bacteria resistant, cleanable polymer membrane
- Option: Rib
- Available heights: 50 – 500 mm (in 5 mm steps)
- Leakage: < 1% of nominal flow rate, 100% leakage tested
- Material resistance: -20 °C – +50 °C

Standards

- Hygiene Standard
VDI6022 sheet 1 (01/2018)
ÖNORM H6021 (01/2023)
SWKI VA104-01 (01/2019)
- Fire Standard
EN DIN13501-1 (Class E)
ISO 11925 (Class E)
- Quality Management
DIN ISO 9001: 2015
